## Rolling Thunder

*a celebration of  
Bob Dylan*

The Barbara Belloni Band presents "Rolling Thunder" a tribute to one of the most celebrated poet/songwriters in American history - the man who inspired and guided entire generations around the globe, The Bard of Duluth a.k.a. Bob Dylan.

Rolling Thunder finds The Barbara Belloni Band offering a personal interpretation of Dylan's repertoire. It is an approach which was met with success and acclaim by the broad international audience that witnessed the band's prior project, "Photographs and Memories", a tribute to Jim Croce. The band draws material from various phases of Dylan's career : from his NYC roots debut, to his famous electric turn the Newport Folk Festival, through the period with the Band at Big Pink, from New Morning blues to the country-western tinged Desire and John Wesley Harding - from the Christian Rock period of Saved and Shot of Love, through rock revival on Infidels, Oh Mercy and beyond.

Dylan's biggest numbers, songs that have been covered by The Rolling Stones, Guns and Roses, Jimi Hendrix, George Harrison, Norah Jones, Eric Clapton, Tom Petty and even Francesco de Gregori, are part of the band's show, along with a selection of obscurities and deep catalogue cuts.

Alongside Barbara Belloni is her trusted fellowship, Flamiano Mazzaron and Stefano Stella on electric and acoustic guitars and vocals, Alessandro Arcuri on bass and vocals, and Federico Patarnello on drums.
